DETAILED ACTION

This office action is a response to the amendment filed on 2/10/2006.

Election/Restrictions

1. Newly submitted claims 26-31 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The newly submitted claims 26-31 teach limitations such as a plastic base assembly comprising four sides extending from a base plate and a plastic cover assembly comprising four sides extending from a cover plate, which are not taught by the originally presented invention of claims 19 and 20.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 26-31 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Lembke on 4/6/2006.

The application has been amended as follows:

IN THE CLAIM

Cancelled the claims 23 and 25.

Cancelled the non-elect claims 26-31.

2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose the claimed invention such as a hinge is molded onto an exterior surface of the base and an exterior surface of the cover to mechanically couple to form an enclosure defined by the base, the cover and the hinge, wherein the spindle motor and the head stack assembly are pivotally attached to the base. The closest reference, Palson (US PAT. 3,737,067), teaches a process of making a plastic box comprising a hinge (48) molded onto an exterior surface of a base (12) and an exterior surface of a cover (14) to mechanically couple to form an enclosure defined by the base, the cover and the hinge. However, Palson fails to teach a spindle motor and a head stack assembly, which are pivotally attached to the base. Palson teaches a process of making a plastic box for a tape cartridge, not the disk drive. Therefore, it would not be obvious to modify a plastic box for a tape cartridge of Palson by adding any mechanism such as a spindle motor and a head stack assembly, since doing so would destroy the structure of the plastic box of Palson.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Claims 19-22 and 24 are allowed.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul D. Kim whose telephone number is 571-272-4565. The examiner can normally be reached on Monday-Friday between 6:00 AM to 2:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Vo can be reached on 571-272-4690. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
